Why Go Green?

Green Planet

Recyclable Things

Water Waste

How You Can Help

Fun Things To Do To Help Recycling:

- Play a recycling game by putting a cardboard box in front of you and throwing used up paper into the box.
- Race to see who can turn off the lights the fastest.
- Fill up the water into your water-gun and squirt water at your friends.

Issue Topics

Going would make a difference in your community. It would help clean the area that you live in. Recycling is not waste since a lot of people **abuse** it. People who abuse recycling doesn't really care what they're doing and just waste what they're using. That seems like junk to them right?

Changing the world would make a green-free planet. Earth needs to be clean so that trees can give us oxygen to survive. By getting rid of the garbage in your yard, you might as well help the trees and other people.

The common recyclable

things are paper, plastic, cardboard, aluminum cans, tin cans, newspaper, and magazines. Usually if there is a recycling sign, you can recycle that item when you are finish using it. Make sure that the aluminum cans and tin cans must be clean before recycling them. Also food can be recyclable by putting them in bins and composting them. Food such as vegetables, fruits, tea bags, coffee grounds, filter papers, paper towels, tissues, and egg shells.

Water wasting is a waste because using too much water can kill many animals

Our World Can Be A Green Planet

living in the ocean, sea, and etc. It could even kill the fish that most predators such as bears, whales, and birds prey on.

Next Issue

Coming up next, the issue will be a Back to School article.

This article may seem boring but it

will be fun. It will have lots of pictures instead of text.
